

Select Harvest U.S.A.

Pesticide Residue and Heavy Metal Testing Certificate

To whom it may concern:

We hereby certify that almonds produced by Select Harvest U.S.A. have undergone annual Pesticide Residue Testing and Heavy Metal Testing for Crop Year 2017.

Random samples compiled from Grower Deliveries were combined to create composite samples that were subject to a full Pesticide Scan, that included over 312 Pesticides used in the Almond Industry. Heavy metal testing included Cadmium, Lead, Mercury and Arsenic.

Testing was completed by an ISO/IEC accredited and USDA Approved 3rd Party Laboratory. Pesticide Residue testing method reference: AOAC 2007.01.GS-MS/MS. Heavy Metal testing method reference: ICP-MS.

All Pesticide Residues and Heavy Metal results were below the limits of detection for compliance for processing and packaging almonds. These results correspond with the Pesticide Residue and Heavy Metal testing provided by the Almond Board of California.
